PROFILE

Design consulting professional with 13+ years of experience creating digital experiences across enterprise platforms, web, mobile and omnichannel products. Throughout my career, I have partnered with global organizations across Telecommunications, Banking & Financial Services, Healthcare, Insurance, Travel & Hospitality, and Utilities to solve complex business and user experience challenges.

Over the last several years, my focus has evolved towards enterprise product design, where I simplify complex workflows, design scalable systems, and collaborate closely with Product, Engineering and Business teams to deliver business-critical solutions. I combine user-centered design, systems thinking and emerging AI capabilities to create intuitive experiences that balance user needs, business goals and technical constraints.

CORE EXPERTISE

Enterprise Product Design | Systems Thinking | UX Strategy | Complex Workflow Design | Human-Centered Design | User Research | Information Architecture | Journey Mapping | Service Design | UX Writing | Design Workshops | Heuristic Evaluation | Usability Testing | Design Systems | AI-Enabled Design Workflows | Digital Transformation | Stakeholder Management

PROFESSIONAL EXPERIENCE

AMDOCS

Senior UX Specialist – Experience Design

Nov 2022 – Present

- Led experience strategy for complex Telecom CPQ and Order Management platforms, simplifying enterprise workflows supporting major telecommunications providers including Optus - Australia and Elisa - Finland.
- Designed workflows and journeys balancing business rules, operational constraints and user needs across interconnected enterprise systems.
- Partnered with Product Management, Engineering, Domain Experts and Business stakeholders to define enterprise product strategy, experience architecture and future-state workflows.
- Influenced product direction through UX strategy, design reviews and stakeholder workshops, balancing business priorities with user and technical constraints.

- Simplified complex decision-making by restructuring task flows, validation logic and information hierarchy and designed for multi-step workflows involving configuration, approvals, validation and fulfilment.
- Reduced quote and order creation time by 25% through workflow simplification and information architecture redesign.
- Reduced order fallout and validation errors by 15%.
- Drove adoption of a shared design system, improving design consistency and reducing design and development effort across multiple product teams.

AI + DESIGN STRATEGY

AI-Enabled Experience Design | AI-assisted Research Synthesis & Testing | Human-AI Collaboration | AI Decision Support | UX Content & Microcopy | Agentic Workflow Exploration | Rapid Prototyping | AI-native Experience Design
